SUBJECT: Update on coronavirus (2019-nCoV) situation

Dear Valued Customer,

In response to the rapidly developing Covid-19 epidemic, governments around the world are strengthening preventive and precautionary measures to limit the spread of the virus and protect populations.

We would like to inform you that we have implemented all necessary preventive measures in this critical and challenging period.

First and foremost, we have reinforced all relevant preventive and cautionary measures, in accordance with the latest health authorities' recommendations, to **ensure the safety and wellbeing of our employees and sub-contractors.**

In this difficult context, all our employees are fully committed to ensure the **continuity of our operations:**

- Our sites are strictly following our **Business Continuity** Plans to mitigate all potential consequences of the spread of the epidemic at our 24 facilities and 3 R&D centers in Europe, in the US and in Asia;
- Our **Purchasing department** is actively working to reduce any potential impact on our supply chain, relying on Seqens' unique positioning on intermediates including upstream-integration capabilities.

Thus, as of the date of this statement, there are only very few delays identified across all our activities.

If any of these may potentially affect your company, your Seqens Account Manager will inform you.

The Seqens crisis unit, based at Group level, closely monitors the evolution of the coronavirus situation and be reassured that all our employees are working hard to prevent and mitigate any supply disruptions.

Sincerely,

Pierre Luzeau
CEO SEQENS GROUP
